PHOTOCAPTURE
CENTRE™

For your home office - full colour printing, scanning and photo copying that can be shared with all the family.

Everyone will want to use the DCP-560CN, and because it's network ready, they can! Multiple users can access its many features, whether its the fast colour printing for those presentation slides you've been working on, or scanning and copying the family's homework projects.

As with all Brother multifunction printers, it is easy to use - the Automatic Document Feeder will make light work of scanning multipage documents and we've put the ink cartridges at the front so you can change them easily. Furthermore because we use separate ink cartridges you only have to replace the colour that runs out, saving you money in the future.

The whole family will love the PhotoCapture Centre™ capabilities, allowing you to print amazing-quality photos straight from your digital camera, memory card or USB stick.

You can view your photos on the LCD printer screen and even enhance them before you print without the need of a PC, for example getting rid of red eye and repositioning for the perfect picture. Why don't you get artistic; print off sections of your favourite photographs in a unique piece of artwork. You'll be amazed what you can do.

You can have even more fun with the FaceFilter software supplied FREE with

your DCP-560CN – for a bit more wrinkle reducing, feature enhancing of your photos! We've even put in a second paper tray so you don't have to worry about changing the paper, it's ready every time you want to print photographs.

To achieve high quality printing we recommend using Brother's Innobella™ ink and paper technology.
