

CL30 HEAVY STOCK ENABLED

Business cards, direct mail, posters, brochures, & more!

Heavy Stock Printing
in Vivid Colour

XANTÉ

XANTÉ® CL30 Heavy Stock Enabled

Engine Print Speed	Up to 30 ppm colour / 37 ppm monochrome
Resolutions	1200 x 1200 dpi
Processor	PowerPC 600 MHz Processor
Memory	XANTÉ CL30 HSE Standard 256 MB SODIMM; (expandable to 1,024 MB max) XANTÉ CL30D HSE Standard 320 MB SODIMM; (expandable to 1,024 MB max) XANTÉ CL30HC HSE Standard 320 MB SODIMM; (expandable to 1,024 MB max) IDE drive standard on XANTÉ CL30D and HC models only.
Toner	Black, Cyan, Magenta, Yellow
Monocomponent Cartridges	Black, Cyan, Magenta, Yellow
Standard Life Cartridges	CMYK - Up to 7,500 Sheets (letter/A4; 5% coverage)
Extended Life Cartridges	Black - Up to 15,000 sheets, (letter/A4; 5% coverage) Colour - Up to 15,000 sheets, (letter/A4; 5% coverage)
Image Drum Life	*Approx. 15,000 (A4 size) continuous printing
Fuser	30,000 (letter/A4)
Transfer Belt	30,000 (Letter/A4)
Media Handling	
Main Tray	Letter; A3; A4; ledger; Executive; B4; B5; COM 10; DL; 12" x 18"; SRA3
Multipurpose Tray	327mm x 1200mm (12.9" x 47.24")
Print Area	5mm from all edges (excluding oversize pages)
Media Weights	
Main Tray	75 gsm to 177 gsm
Heavy Stock Tray	176 gsm to 330 gsm
Media Types	Plain paper, transparencies, laser-quality labels, thick paper stock. Duplexing limited to plain paper and thick stock only.
Standard Input	550 sheet standard cassette 1,650 sheet high capacity feeder (standard on XANTÉ CL30HC only)
Optional Input	Two 550 sheet paper feeders, 1,650 sheet high capacity feeder
Standard Output	500 sheets face down, 100 sheets face up
Duplexing	Optional on XANTÉ CL30 Standard on XANTÉ CL30D and HC models
Dimensions	(W) 665mm (26.2") (D) 589mm (23.2") (H) 462mm (18.2")
Weight	70.0 kg (155 lbs) printer weight
Power Requirements	115-127 V, 50/60 Hz, 11A (220-240 V, 50/60 Hz, 6A)
Noise Level	Printing - less than 54 dB; Standby - less than 45 dB
Printer Languages	True Adobe® PostScript® 3™; PCL® 5C
Typefaces	136 resident PostScript Typefaces; TrueType 80 font rasterizer; Types 1, 3, 4, 5, and 6 PostScript download font support
Standard Interfaces	Simultaneously active - 10/100 BaseT Ethernet®, IEEE-1284 bi-directional parallel, and USB**

The new Heavy Stock Enabled option for the XANTÉ CL30 allows users to print up to 330 gsm. The CL30 HSE's straight paper path makes it possible to print high-quality full-colour business cards, postcards, direct mail pieces, brochures, and in-store signage all on heavy stock at a low cost per page.

CL30 Heavy Stock Enabled Features :

Job Management Tools

- Print Spooling allows the host computer to continue processing jobs independent of the printer's status.
- Proof and Print allows printing of a single copy of a document for checking before printing multiple copies of the same document.
- Secure Printing allows the printing of confidential documents on printers that are shared with other users.
- XANTÉ Print Direct allows you to send a selected PDF file directly to the printer, a faster and easier process than using Adobe Acrobat separately before printing.
- Store to Hard Disk allows print jobs to be prepared and stored on the internal hard disk for printing on demand.
- The XANTÉ Storage Device Manager allows you to view and delete the Proof & Print, Secure Print, and Stored Job files that reside on the printer's internal hard drive.

Automatic Colour Recalibration The CL30 automatically recalibrates its settings after every 500 prints, maintaining high quality even after thousands of prints.

Digital Colour Printing Single-pass colour utilizes four in-line digital printheads and image drums to speed the page through, laying down cyan, magenta, yellow, and black toner in one pass. This technology enables faster document throughput.

Media Flexibility allows for oversize printing up to 12.9" x 47.24" (327mm x 1200mm). Print on ordinary bond paper or specialty stocks including coated, card, transparencies, and laser-quality labels.

True Adobe® PostScript® 3™ offers reliability, increased performance, and the assurance of compatibility to work from virtually any software application and hardware environment.

XANTÉ's ColourMatch Software controls colours beyond the standard settings. XANTÉ's ColourMatch Software easily allows the user to modify colours on the XANTÉ CL30 to more closely match the colour generated on the final output device. In addition, compensation can be made for different colour paper stocks. For each device you select, the wizard-like software will create profiles sequentially for monitors, scanners, and the XANTÉ CL30.

Built-in Web Browser

The CL30 has a built-in web browser which allows the user to check the status of the printer and perform other administrative functions over the internet, including:

- View status of the printer
- Change network configuration
- Configure alerts: the printer can send an email to the administrator (or to you) when it needs consumables or service
- Change printer menu configuration, such as paper size, type, colour, settings, etc.
- View usage rates or current consumables status

E-mail Alerts

Up to seven e-mail addresses can be programmed into the CL30. The appropriate people can then be notified, in advance, before the printer stops printing.

* Page sizes over SRA3 can only be printed using the multipurpose tray.
