DATASHEET

WP-4535 DWF<sup>7</sup> model

We all know how frustrating it is waiting for a print job, even more so when it's only a few pages. That's why Epson created the WorkForce Pro WP-4000/WP-4500 series of printers.

Engineered for business it offers a 50% lower cost per page<sup>1</sup> and faster printing<sup>2</sup> for those small print jobs. And when printing double-sided it's twice as fast as the nearest leading competitor<sup>3</sup>.

Alongside this, the WorkForce Pro series offers a massive 80% reduction<sup>4</sup> on energy consumption compared to competitive lasers – providing significant cost and environmental savings. Ink cartridges are clean and easy to change, so the process is hassle-free.

Designed to suit the modern office – the WP-4000/WP-4500 series is the ultimate professional tool. Its high-yield, superior quality DURABrite Ultra ink cartridges are low maintenance and offer low-cost printing, producing up to 2,400 pages<sup>5</sup> or higher, if needed. Combined with a high print resolution of up to 4800x1200dpi, businesses get top-quality prints which are water, smudge, highlighter and fade resistant because they are instantly dry. And the paper capacity of 330 sheets as standard means you won't need to spend valuable time looking after it. The series comes with Epson Connect<sup>6</sup> to meet all mobile printing needs, enabling users to print from smartphones and tablet PCs.

There are three models in the Black series: the WP-4025 DW, WP-4535 DWF and WP-4545 DTWF. On top of the sleek black design – which fits perfectly into any modern micro or small business – the models all come with USB 2.0 and WiFi connectivity as standard. For users who want no fuss and minimal maintenance, the WP-4545 DTWF boasts a large and innovative smart-navigation touch-panel for ease-of-use and an additional paper tray as standard to expand its capacity up to 580 sheets.
